1. The following is an examiner's statement of reasons for allowance: The reason for allowance is the provision of a nonsymmetrical spring biasing of the idler roller of a driven roller/idler roller pair by employing a nonsymmetrical torsion spring having a central coil wrapped around the idler shaft supporting the idler roller and integral extending linear wire legs which are anchored in nonsymmetrical anchoring positions. The prior art fails to teach or fairly suggest anchoring the ends of the spring in nonsymmetrical positions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The requirement of applicant to provide headings for various sections of the specification is withdrawn in view of applicant's remarks on page 5 of the amendment filed 17 November 2004 correctly pointing out that such headings are not mandatory.
